

STARTER KIT ELECTRICAL

<https://www.ulbrich-sk.sk/starter-kit-electrical>

Simply connect and it's ready to use. All you need: compressed air and an electrical socket. With the accessories we offer, you can construct a complete plasma system in just a few steps. All parameters are controlled and visualised by our user-friendly software.

The benefits:

- Easy handling of the PS2000 high voltage source with PB3
- Uncomplicated design and start-up
- Processes with variable parameters are carried out quickly
- Monitoring and possible storage of all important parameters for analysis by PS2000.exe
- Integrated automated operation enables processes to be carried out quickly and easily
- Easy fault diagnosis

Your benefits:

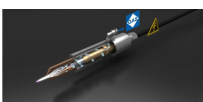

- Simple integration
- Maximum operational reliability
- Optimum efficiency

Possible applications:

- Plasma activation
- Plasma coating (plasmadust®)
