

## STARTER KIT GAS

<https://www.ulbrich-sk.sk/starter-kit-gas>

Simply connect and it's ready to use. All you need: compressed air and an electrical socket. With the accessories we offer, you can construct a complete plasma system in just a few steps. All parameters are controlled and visualised by our user-friendly software.

### The benefits:

Convenient solution for the integration and operation of the PS2000 high voltage source.  
All necessary components for gas control in one package.  
Simple integration into higher-level control circuits via CAN bus communication (CanOPEN)  
Fully automated operation in conjunction with the Reinhausen Plasma control software "PS2000exe"

### Possible applications:

Plasma activation  
Plasma coating (plasmadust®)
